SHOULDER SHAPING NOTES

For the shoulders you will work short rows to get a nice slope to the shoulder. The pattern is written for wrap and turn short rows. If you choose to use German short rows instead that is okay, but remember you **MUST WORK** the stitch that would normally be wrapped. If you need help please watch the video.

IMPORTANT NOTE: Again, it is important that your armhole measures the distance listed in the pattern for the size you are making. The checklist above is based on the row gauge of 625 rows per inch, so if you are not getting that same gauge you will need to adjust the number of rows you do on your vest.

If you did the same number of rows on the fronts as you did on the back to get the same armhole measurement you should be perfect!

ANOTHER NOTE: The row numbers listed below do NOT coincide with the stitch row numbers, they are just the number of rows you need to do for the shoulder shaping. However, it is my suggestion you just work all these rows in stockinette stitch and not do any 5-wraps should you have them.
